

100W

FRACTIONAL CO₂ LASER

Fractional **Scanner** System

Quality Ultra-Pulse Technology

Higher Peak Power

Faster Scanning Mode

For Your Beautiful Life

Medical & Aesthetic Solutions

1000U

Fractional CO2 Laser with **Scanner** Handpiece

SNJ-1000U is a advanced fractional co2 laser as scanner type with a higher power module. It is based on quality ultra-pulse technology for less pain and faster recovery. They deliver good effects especially for skin resurfacing, rejuvenation, and scar improvement.

1 **Faster Scanning Mode**

Easy to Grab Light-Weight Fractional Scanner Handpiece with 120um Spot Size and Faster Treatment for More Use

2 **Higher Peak Power**

Optimized Scanning Software with Only 3 Seconds to be Set for Higher Laser Power

3 **Quality Ultra-Pulse Technology**

100W Laser Power Output by Power Board and Cooling System based on More than 15-Year CO2 Laser Technology & Experience for Less Pain and Faster Recovery

TREATMENT EFFECTS

- Skin Resurfacing & Rejuvenation
- Scar Improvement
- Skin Whitening & Lifting
- Pore Tightening
- Soft Peeling
- Fine Wrinkle Improvement
- Pigment Lesions Improvement
- Vaginal Tightening (with Special Handpiece)
- Various Surgical Use

TECHNICAL SPECIFICATIONS

- Wavelength: 10,600nm
- Mode: Fractional Scanner / CO2 Ultra-Pulse
- Max. Power: 100W
- Scan Area: Up to 20x20mm
- Pixel Energy: 10~300mJ
- Dot Density: Level 1~3
- Shape: Square, Triangle, Circle, Moving Type
- Electrical: 100~240V, 50/60Hz
- Dimension: 450(W) x 550(L) x 1500(H) mm
- Weight: 50kg (Max. Weight: 62kg))
